

AccuFIT 9000[®] PRO

Made for the most challenging environments.

Fit Test All Full and Half Face Respirators, SCBA Masks and ALL N95's

The AccuFit 9000 PRO is capable of fit testing all brands and models of Full and Half Face Respirators, SCBA Masks and all brands and models of N95 Filtering Facepiece Respirators (FFP) using the 2 minute 29 second OSHA Approved FastFit Protocol.

Stand Alone or PC Operation

When operated in standalone, the AccuFIT 9000 PRO requires no PC connectivity. All test results are conveniently stored on the unit's internal memory that can be transferred to a computer when you're ready – and it also means less equipment to transport and carry when conducting fit tests at multiple locations!

When connected to a PC (via LAN, Wi-Fi, or USB), the AccuFIT 9000 will automatically download and store all test results to your computer. There's even an extra USB port for direct connection to your printer or keyboard!

Particle Counting (CNC) Technology

The Condensation Particulate Counter (CPC) used in the AccuFIT 9000 PRO has been optimized to enhance counting efficiency. The good news – less chance of running out of particles and receiving an error message warning you that the ambient particle count is too low.

Thoughtfully Designed For All Respirator Users

The AccuFit 9000 PRO encompasses all the features of the standard AccuFit 9000, including OSHA's 2 minute 29 second fit test protocol. This unit features a built-in classifier, enabling it to perform quantitative fit testing for N95 masks and accurately fit test all mask types. Rugged, quick to deploy, and fully equipped, the AccuFit 9000 PRO includes all necessary accessories for immediate fit testing and comes with a standard 3-year warranty. Additionally, initial virtual training and distributor support are included.

3-year Warranty

With an industry-leading three-year warranty, AccuTec delivers quality and reliability you can count on.

Fit Test N95's in 2 minutes 29 seconds

The AccuFit 9000 PRO expands testing capabilities to include nearly all ANSI-approved respirators, covering all N95 brands and models. With the proprietary AccuPunch Probe Insertion Tool, preparing an N95 for fit testing is fast and easy.

No Tablet Needed

The AccuFIT features an industry-leading 7-inch touchscreen display, enabling fit testing directly on the unit without needing a computer or tablet. This design allows for quick, reliable, and convenient fit tests on the go, without the hassle of extra equipment.

Quick & Easy-To-Use

Fit tests can be completed in just **2 minutes and 29 seconds**, delivering the quickest and most accurate results available. Rest assured, you'll be fully OSHA-compliant, and your employees can breathe easy knowing their mask is providing reliable protection on the job.

The world's most accurate, data-driven method for respirator testing.

ADDITIONAL FEATURES

- Free initial virtual training and customer support are included
- 3 Year Warranty
- Color Touch Screen
- WIFI Enabled
- Ultra High-Speed State of the Art Computer Processor
- English, Spanish, French, and Portuguese Language Options
- OSHA, HSE, & CSA Protocol Compliant
- Three USB Ports and one Ethernet Port
- Integrated AccuTec ME Medical Questionnaire Technology
- Control up to (4) AccuFIT instruments with one computer
